## PERSONAL PROFILE

A Computer Science graduate with a major in Informatics, I have hands-on experience as a Backend Developer intern. During my internship, I worked on building REST APIs and developing server-side features using modern web technologies to create efficient and scalable systems. I am accustomed to working collaboratively in teams, possess strong time management skills, and am capable of completing tasks according to targets and deadlines. I also have strong communication, problem-solving, discipline, and adaptability skills, with a commitment to continuously improving my competencies in backend system development.

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                  |                            |

## EDUCATION

Bachelor of Computer Science

Klabat University Manado

Aug 2022 – Jun 2026

GPA: 3.83

## SKILLS

### Tools:

- Draw.io, Figma, MongoDB, Microsoft Office (Word, PowerPoint, Excel/Sheets), Postman, Visual Studio Code, GitHub, HTML, CSS, JavaScript.

### Soft Skills:

- Excellent communication, teamwork, and organization.
- Strong in problem-solving, time management, discipline, and adaptability.

## ORGANIZATIONS

Voice of Computer Science

Secretary

Jan 2025 - Aug 2025

(Faculty Choir)

- Preparing and drafting official permission letters for each choir activity.
- Recording and documenting the attendance of all members at every activity conducted from the beginning to the end of the semester.
- Supporting the organization's leader by providing input and constructive ideas for the improvement and development of the organization.
- Reminding all members of upcoming rehearsal meetings to ensure punctuality and full attendance.
- Actively participating and engaging in every meeting and activity held throughout the semester.

## CERTIFICATION / TRAINING

Basic Web Programming

Dicoding

Oct 2024

This certification provides knowledge in web development basics, including HTML, CSS, and JavaScript. It covers the essential skills needed to build and design websites, focusing on creating interactive and responsive web pages.

Introduction to Software Engineering

RevoU Mini Course

Jul 2024

Learned the fundamentals of web development using HTML, CSS, and JavaScript, including basic software engineering concepts and responsive web design.

Adobe Certified Profesional

Certiport Graduate

May 2025

An understanding of how to use Adobe software, in this case Photoshop software. In this certification, we must know about the basic concepts of design and how to operate the software and also every existing tool.
