PERSONAL PROFILE

A Computer Science graduate with a major in Informatics, I have hands-on experience as a Backend Developer intern. During my internship, I worked on building REST APIs and developing server-side features using modern web technologies to create efficient and scalable systems. Skilled in modern web technologies, I am currently aligning my focus to master client-side web development as a Junior Frontend Developer. I am committed to continuously learning and developing my skills through both practical experience and software research. My long-term goal is to bridge these core disciplines and advance into a Full-Stack Developer and Mobile Application, focusing on technological innovation and scalable systems. I prioritize effective communication and team collaboration in every project, with strong time management skills to deliver tasks efficiently and effectively.

EXPERIENCE

Teacher Assistant	Universitas Klabat	Feb 2026 – May 2026
- Assisted lecturer in facilitating classroom activities and ensuring a productive learning environment. - Reviewed and evaluated student assignments with strong attention to detail, providing constructive feedback to improve learning outcomes. - Monitored student progress, maintained accurate academic records, and ensured data was organized and documented systematically. - Collaborated with lecturer to maintain assessment quality and ensure consistent academic standards during examinations and evaluations.		
Backend Developer (Intern)	Rumah Sakit Advent Manado	Jul 2025 – Dec 2025
- Collaborated with stakeholders to identify system requirements and ensure alignment with user needs. - Coordinated with field supervisors to gather operational insights and support system implementation. - Designed and structured NoSQL databases using MongoDB for scalable and organized data management. - Participated in team discussions and collaborated closely with developers throughout the development process. - Developed RESTful APIs using Node.js and Express.js to support backend functionality and ensure efficient client-server communication. - Utilized Git for version control to manage code changes and support collaborative development workflow. - Presented system usage and features to non-technical users to improve understanding and adoption. - Collected and maintained team attendance documentation during the internship for final reporting purposes.		

PROJECT

Thesis Project: SmartLeave Filing System	Jan 2026 – May 2026
- Contributed to the thesis documentation, covering system background, methodology, implementation overview, and final analysis. - Developed use case scenarios in collaboration with the development partner to define system behavior and functional requirements. - Conducted direct user interviews to gather feedback regarding system functionality and usability for evaluation purposes. - Supported documentation of system evaluation results based on user feedback and system usage analysis.	
Sistem Rekrutmen dan E-Filing Berbasis Web Pada Rumah Sakit Advent Manado	Jul 2025 – Dec 2025
- Implemented backend layer architecture to support a structured, maintainable, and scalable system development process. - Built RESTful APIs for CRUD operations to manage recruitment and employee data within the system. - Implemented CSV file import functionality to streamline and accelerate bulk employee data entry, reducing manual input errors. - Developed several frontend pages using React.js and integrated them with backend to ensure seamless user interaction. - Implemented automated email notification features using nodemailer for system communication processes.	

- Applied middleware and Role-Based Access Control (RBAC) to manage user authentication and feature access permissions.

Mobile Application: Finote

Apr 2025

- Contributed to the development of a personal finance mobile application using React Native by implementing features for income tracking.
- Developed responsive and user-friendly mobile interfaces in React Native based on UI/UX mockup designs to ensure a seamless user experience across the application.
- Integrated Firebase Realtime Database to store and synchronize income tracking data in real time, ensuring efficient data updates and monitoring within the application.
- Collaborated with team members through effective communication and task coordination to ensure smooth development, feature integration, and timely project delivery.

Frontend Project: Car Wash

Nov 2024

- Developed key user interface components including Home, Search, Navigation Bar, Booking, Payment, and Contact screens as part of the application.
- Implemented responsive and user-friendly UI layouts to ensure consistent user experience across different features of the application.
- Collaborated with the development team to integrate UI components with project features and maintain design consistency across the application.

EDUCATION

Bachelor of Computer Science	Klabat University Manado	Aug 2022 – Jun 2026 GPA: 3.83
------------------------------	--------------------------	----------------------------------

SKILLS

Language:

- JavaScript, HTML, CSS, TypeScript, Kotlin.

Framework:

- React.js, Express.js, React-Native.

Database & Tools:

- MongoDB, Firebase, GitHub, Git, Postman, Visual Studio Code, Microsoft Office (Word, PowerPoint, Excel), Figma, Draw.io, Spreadsheet.

Soft Skills:

- Problem-solving, critical thinking, analytical thinking, time management, discipline, communication, teamwork, organization, and adaptability.

ORGANIZATIONS

Voice of Computer Science (Faculty Choir)	Secretary	Jan 2025 - Aug 2025
• Prepared and drafted official permission letters for each choir activity. • Recorded and documented the attendance of all members at every activity conducted from the beginning to the end of the semester. • Collaborated with the organization's leader by providing input and constructive ideas for the improvement and development of the organization. • Managed internal communications to remind members of upcoming rehearsal, achieving high attendance rates. • Actively participated in weekly strategic meetings and activity held throughout the semester. • Recorded official meeting agendas and minutes for both officer and member assemblies to streamline internal team alignment.		

CERTIFICATION / TRAINING

Adobe Certified Profesional	Certiport Graduate	May 2025
-----------------------------	--------------------	----------

An understanding of how to use Adobe software, in this case Photoshop software. In this certification, we must know about the basic concepts of design and how to operate the software and also every existing tool.

Basic Web Programming**Dicoding****Oct 2024**

This certification provides knowledge in web development basics, including HTML, CSS, and JavaScript. It covers the essential skills needed to build and design websites, focusing on creating interactive and responsive web pages.

Introduction to Software Engineering**RevoU Mini Course****Jul 2024**

Learned the fundamentals of web development using HTML, CSS, and JavaScript, including basic software engineering concepts and responsive web design.
